

## About Me

I aim to bridge the gap between technicality and creativity to equip dynamic apps with a refined user experience. My background in Math, Theatre and Software Development has allowed me to cultivate strong and diverse problem-solving skills. I'm eager to leverage my technical abilities with my unique perspective to design high performance apps that are incredibly engaging.

## Key Skills

## Experience

### UX Engineer

Leidos | Remote | August 2021 - Present

- Designed and implemented an improved interface as a government contractor for the U.S. Department of Defense.
- Created 15+ high-fidelity prototypes and led dozens of presentations to walk stakeholders, managers and developers through designs for feature improvement.
- Utilized numerous systems to see changes through from initial design to implementation in the code base.
- Improved workflow and design consistency across the app in collaboration with fellow engineers and designers.

### Frontend Software Engineer Intern

Flexie | Charlotte, NC | May 2021 - August 2021

- Supported design enhancements based on customer feedback for a Startup Fintech company.
- Worked in collaboration with the engineers and managers to prepare over 50 design materials for presentations.
- Utilized frameworks such as React and Flutter to improve UI and maintain design integrity across mobile devices.
- Following a 2000% user increase, I helped streamline the helpdesk service for users to find support with all concerns.

### House Manager

WFU Box Office | Winston-Salem, NC | Aug 2016 - Jan 2020

- Produced over 30 designs for web and print marketing.
- Partnered with various on campus groups to devise and implement improved design strategies.
- Optimized the strict budget while managing marketing, patron donations and thousands of ticket sales.
- Managed large audiences, handled production logistics and delegated tasks for 25+ theatre and dance performances.
